

Supplemental Figure II

Supplemental Figure II: Effect of Trx-2 on pro-inflammatory markers in tissue heart after experimental MI. Evaluation, at the mRNA level, of representative inflammatory markers in heart of 8-week-old mice treated with AAV Luciferase and AAV Trx-2 one month before MI. mRNA quantification of IL-6 and IL-1 β in heart tissue of mice with experimental MI. Luciferase (n= 9) and Trx-2 (n= 6).
